RE: REFERENCE LETTER ON THE TRAINING OF NET COST ESTIMATOR SOFTWARE

The Zambia Public Procurement Authority [ZPPA] has over the past three years, that is 2018 to date 2021, been approached and sensitized through demonstration of the Cost Estimator Software by Rising East Training Institute [RETI], for high value construction works for buildings , road works and other infrastructure projects procured and executed in the Public Sector by procuring entities. The software is an invaluable tool that can be employed by procuring entities to pre-determine and project the likely costs of an envisaged works project.

ZPPA Participants who were sentised to the sotfware greatly appreciated the software's capability which has immensely improved their cost estimations and budgeting skills in construction projects during audits and inspections exercises.

The software enabled the participants to build up rates and has potential to be developed as a tool for prescribing average built up prices for construction elements based on Bills of Quantities.

RETI is therefore recommended by the ZPPA to provide training to your entity based on the Net Cost Estimator Software for enhanced and effective estimation of project costs.

**RE: REFERENCE LETTER ON THE TRAINING OF NET COST ESTIMATE
SOFTWARE**

This is to confirm that our Provincial Infrastructure Officers attended the training on Net Cost Estimator Software at Rising East Training Institute.

The Ministry appreciated the training as the program tended to enhance the estimation skills in the Construction Industry in general.

REF: TRAINING ON NET COST ESTIMATOR SOFTWARE

We make reference to our team of 12 staff members who attended training on the use of Net Cost Estimator Software at your premises on 28th February, 2020.

We would like to inform you that we found the training on the use of Net Cost Estimator to be user friendly and we were able to understand the basic concept using Net Cost Estimator software. The participants from the Department benefited from the following;

- i. Set up a new project on Net Cost Estimator Software.
- ii. Set up a BOQ into Net Cost Estimator for pricing.
- iii. Develop a Resource data base.
- iv. Create rate build up for pricing BOQs for Project Budgeting & Pretender Estimate.
- v. Develop schedules of materials labour plant etc for in house project.
- vi. Use the rate build up facility for evaluating variations

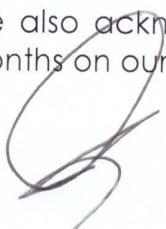

This will help the Department in the following areas;

- i. Developing standard rates build ups for Cost Estimating of our various projects or budgetary purposes.
- ii. Evaluating contractors bid pricing to ensure value for money for our Client Ministries
- iii. Evaluating variations by using a standard tool to ensure efficiency.

The proposed upgrading of Net cost Estimator to include Billing will assist Quantity Surveyors to develop Bills of Quantities easily, quickly and efficiently which easily be linked to Cost Estimating of the Bill items.

Furthermore, the upgrading to include Cost tracking will further assist any in-house maintenance Department to ensure efficiency in managing construction costs.

We also acknowledge the instillation of the software for a trial period of two months on our systems.

Dear Sir/Madam,

RE: LETTER OF RECOMMENDATION AND SUPPORT ON THE USE OF NETCOST ESTIMATOR SOFTWARE

We write to confirm that L T Construction Software limited made a presentation of the NET COST ESTIMATOR SOFTWARE to the committee of ACEZ early this year.

We would like to advice that NET COST ESTIMATOR is indeed a good application that can be used to develop Price build ups, Cost Estimates and Cost Control by Engineers in the construction industry.

The Association is currently in discussion with LTCS to sign an MOU with a view to conduct training in the use of Net Cost Estimator software for Engineers in Zambia.

Yours faithfully

Chituwa Sinkala Chulu

RE: TRAINING AND INSTALLATION OF NET COST ESTIMATION SOFTWARE

The above captioned matter refers.

The Ministry acknowledges receipt of your letter dated 11th August, 2021 regarding the training and installation of net cost estimation software.

We are grateful that the presentation made is beneficial to the water sub sector as it will assist in coming up with the following;

- Developing budget estimate for new, future water related projects at feasibility design stage.
- Developing of an accurate Engineers estimate as a basis for evaluating contractors tender submission during financial evaluation
- Developing price index for water and sanitation projects in accordance with the new ZPPA Act of 2020 prior to tender award.
- Evaluating contractors' rates for variations during construction works.

The Ministry will plan to train the Officers on how to use this software once resources are available through the funding under TEVET as advised by you. Alternatively once funds are mobilized from Ministry of Finance you will be engaged to conduct this training.

The Ministry would like to thank you for availing this software and we are hopeful it will be beneficial in improving our service delivery.

Attention Hon. L Tembo

Dear Sir

RECOMMENDATION OF NET COST ESTIMATOR SOFTWARE

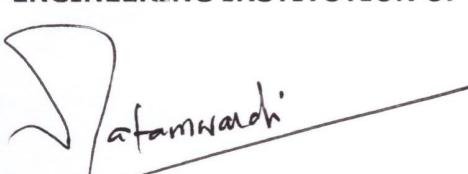

We make reference to your presentation of Net Cost Estimator software to EIZ Council and your letter dated 22nd July 2019.

EIZ was very delighted at your innovation and we are pleased at your contribution to the Engineering fraternity in Zambia.

We have no doubt that your software will be a useful for use by Engineers in developing cost estimate budget, Pre-tender estimate and pricing of infrastructure projects in Zambia.

We therefore, do not hesitate to recommend the use of this software as a useful tool kit for Engineers.

Yours Faithfully
